be required to complete the form, but he sure to asswer every question:
Fmoily Allowances are being provided to assist Paretts in the raising of their children. This monthly allowance is to be used for health procec-tion, for doctors, deutists and nurses; to provide hetter food, adequate clothing and

shelter, and to help equalize opportunities for all children.

INCOME TAX: No one will benefit from both for their children. Parents have the choice of applying for their Family Allowances or not claim ing the allowance and claiming the full deduction for their children under Income Tax. If they claim the Family Allowance, the amount of deduction from tax will be reduced by the amount of any Family Allowance received. Anyone who is uncertain whether of not he or she will benefit from Family Allowances more than from Tax Deduction should register for the Family Allowance and in this way be on the safe side. Incomes may change during the course of a year.

# multiply by millions!

You've often watched the teller stamp your cheque. Every day, in every branch of every bank in Canada, cheques are being scrutinized, stamped and recorded. During the war years, this daily flow of cheques through your bank has swollen to a torrent. Deposit accounts are more numerous and active than ever before. This increase reflects the tremendous activity of Canadian life and business. Production, purchases and payrolls have all reached record levels;

In addition, three-quarters of a million men and women in the armed services must get their pay, and their dependents receive allowances regularly.

The handling of this wartime volume of cheques is quite apart from numerous special services which the banks have undertaken-the delivery of millions of Victory Bonds and the sale of countless War Savings Certificates; ration coupon banking; subsidy payments to producers; foreign exchange operations.

Yet all this extra work has been carried out at a time when new help has had to be trained to take the place of more than 8,500 bank workers now in uniform.
